

PI First Name	PI Last Name	Project Title	Organization Legal Name	Project Start Date	Project End Date	Requested Cash Amount
Suhail	Ahmad	Innovative Detoxification Column	University of Washington	September 1, 2010	August 31, 2011	\$150,000
Adam	Alessio	Dedicated Computed Tomography System for Evaluation of Atherosclerotic Plaque Progression	University of Washington	August 1, 2010	August 1, 2011	\$110,000
Clifford	Berkman	Imaging Angiogenesis in Solid Tumors	Washington State University	July 1, 2010	June 30, 2011	\$150,000
Julie	Brown	A Randomized Clinical Trial of Pediatric Lumbar Puncture Success using The Compass, a Compact Quantitative Pressure Transducer	Seattle Children's Hospital	July 21, 2010	July 20, 2011	\$150,000
Randal	Ching	Evaluation of a Seating Technology for Improving Core Stabilization to Treat/Prevent Low Back Pain	University of Washington	August 15, 2010	August 14, 2011	\$150,000
Karl	Englund	Replacement of Lead-based Radiation Shielding Materials with Phosphate Cement Composites	Washington State University	July 1, 2010	June 30, 2011	\$149,960
Jay	Gerlach	Leukocyte Sample Preparation Method	Program for Appropriate Technology in Health (PATH)	August 1, 2010	July 31, 2011	\$150,000
Diana	Gilligan	Rapid analysis of finger-stick dried blood spots by mass spec	Puget Sound Blood Center	August 1, 2010	July 31, 2011	\$150,000
Carla	Grandori	Seattle Screens for a Cure	University of Washington	August 1, 2010	July 31, 2011	\$150,000
Shelly	Heimfeld	Genetic Reprogramming of Human B-cells with a Novel Lentiviral Vector to Produce Broadly Neutralizing anti-HIV antibodies in vivo.	Fred Hutchinson Cancer Research Center	August 1, 2010	July 31, 2011	\$150,000
Rodney	Ho	Gd-lipid nanoparticles for a Safer and More Effective MRI Contrast Agent	University of Washington	July 21, 2010	July 20, 2011	\$150,000
Carli	Hoaglan	A novel device displaying real-time continuous pressure readings during central venous catheter placement.	Benaroya Research Institute	November 1, 2010	October 31, 2011	\$150,000
David	Hockenbery	Gain-of-function targeted inhibitors for cancer treatment	Fred Hutchinson Cancer Research Center	August 1, 2010	July 31, 2011	\$150,000
Shaoyi	Jiang	Super Stable Zwitterionic Polymer-conjugated Therapeutic Protein Drugs	University of Washington	June 16, 2010	June 15, 2011	\$150,000
Brian	Kraft	Prototype development for Dr. Diane Cook's Intelligent Environment technologies	Washington State University	September 1, 2010	August 31, 2011	\$150,000
David	Linker	Screening for a preventable cause of stroke	University of Washington	September 1, 2010	August 31, 2011	\$150,000
Harlan	Robins	High-throughput Sequencing of T-cell Receptors	Fred Hutchinson Cancer Research Center	August 1, 2010	July 31, 2011	\$150,000
Eric	Seibel	Laser imaging for early caries detection and cost-efficient oral health	University of Washington	September 1, 2010	August 31, 2011	\$150,000
Thomas	Wight	Targeting the versican V3 protein as a therapeutic for saphenous vein graft bypass failure	Benaroya Research Institute at Virginia Mason	August 1, 2010	July 31, 2011	\$150,000
